

Presidential vs parliamentary system

Parliamentary system vs Presidential system

Parliamentary system is a system of government headed by PM. Democratic but may or may not Republic.

- Executive members are the members of legislature as well
- Prime minister is elected by the legislators, and pm is responsible to the legislature.
- PM's dependent on the pleasure of legislature.
- Dual executive.
- No strict separation of power.
- PM can dissolve the Legislature and legislature can remove the President.

Presidential system is Democratic and Republican form of government. headed by president.

- legislature and executive branch is different.
- President is directly elected and directly responsible to the people.
- Term of the president is fixed.
- Single executive.
- Separation of power is very strict.
- President can not dismiss the legislature and Legislature can not dismiss president easily.

Parliamentary	Presidential
(1) In Parliamentary form of government the parliament or central legislatures is supreme.	(1) In Presidential form of government the President is real executive and he is the most powerful official of the country.
(2) Parliamentary systems of the government is based on the principles of collective leadership. The Council of ministers, having Prime Minister as its head is responsible to the Parliament.	(2) President is the head of the state. Generally he or she is elected directly therefore he is not responsible to the Congress or the Parliament in general.
(3) Head of the government is usually known as Prime Minister.	(3) President is also the head of the government.
(4) The Prime Minister is the leader of the majority party (or of the group of the several political parties).	(4) The President is generally directly elected by the people.
(5) He is accountable to the legislature.	(5) He is not accountable to legislature.
(6) In a monarchy constitutional democracy the monarch may be head of the state. Example the Monarch of Britain. He is a ceremonial executive.	
(7) In a Parliamentary Republic form of Parliamentary government the President is nominal executive. For instance India is a Parliamentary Republic. President in India is a ceremonial executive.	

India - Maldives relation

What led to the 'India out' campaign during Solih's administration?

- The Maldives is a key maritime neighbours of India in the Indian Ocean Region (IOR).
- The country's location holds significant strategic importance to India, especially amid China's growing engagements in the region.
- Although Maldives India ties have been mostly cordial over the years, there was a noticeable tilt towards China during the presidency of Progressive Party of Maldives (PPM) leader Abdulla Yameen from 2013 to 2018.

It was under Mr. Yameen that China included the Maldives as a part of its Belt and Road Initiative (BRI).

- Bilateral ties improved when Ibrahim Mohamed Solih of the Maldivian Democratic Party (MDP) took over the reins from Mr. Yameen in 2018.
- Aiming to reset ties with “one of its closest bilateral partners,” Mr. Solih adopted an ‘India first’ foreign policy to establish a closer relationship with India in the areas of defence, security and economics.
- The growing proximity between New Delhi and Male and high level military exchanges sparked concern in certain quarters, leading to an ‘India out’ campaign spearheaded by the Opposition.
- The critics of the Solih administration alleged that the government was compromising the sovereignty of the island nation and “allowing Indian boots on the ground.”
- The Opposition sharpened its attack after the government signed the Uthuru Thila Falhu (UTF) deal with India in 2021 to jointly develop the National Defence Force Coast Guard Harbour.
- The anti-India campaign emerged as the main poll plank in the 2023 presidential race under the leadership of former proChina Maldivian President Yameen.
- The first signs of a shift in foreign policy emerged when the new Maldivian President skipped India and instead travelled to Turkiye in November on his first official visit.
- The Ankara trip marked a departure from a long tradition of Maldivian heads visiting New Delhi first.
- Why did the decision to revoke the survey pact with India cause a stir in political circles?
 - The Muizzu government caused a stir in political and strategic circles with its decision to revoke a key 2019 agreement with India for conducting surveys in Maldivian waters.
 - The Memorandum of Understanding (MoU) for hydrographic surveying, signed during PM Modi’s state visit to the islands when President Ibrahim Solih was in power, backed the commitment of the two countries to maintain close cooperation in defence and maritime security.
 - Critics of the Solih government, however, had claimed that it harmed national security.

Tableau selection

- The Defence Ministry has finalised a rotational plan which will ensure that all States and Union Territories get a

chance to display their tableaux at the Republic Day parade within a three year cycle.

- This year, tableaux of 16 States/Union Territories (UT) were selected for the January 26 parade following an established process but the Opposition ruled Delhi, Punjab, Karnataka and West Bengal that were not qualified cried foul.
- Only around 15 or 16 tableaux from States/UTs are selected each year, and, obviously, all cannot be accommodated.
- Those States that have not been selected for the parade this year were invited to showcase their tableaux at the Bharat Parv from January 23 to 31 at the Red Fort.
- The new plan, that has been agreed to by 28 States, is aimed at giving everyone an equitable chance at participation.
- The Defence Ministry already has an elaborate screening mechanism for participants in the parade.
- A committee of distinguished persons drawn from various fields including Padma awardees was set up this year too that screened proposals from States and organisations.

- The Ministry of Culture had empanelled 30 agencies for design and fabrication of tableaux through an open selection process and States/UTs were advised to engage these agencies following appropriate procedure.
- While the marching contingents and military platforms at the parade showcase the nation's military might, the tableaux and the performances hold a lens to the country's cultural splendor and diversity.
- In the backdrop of controversies year after year, the new proposal of a rotational opportunity for each State/UT offers a fairer, more transparent mechanism.

How are tableaux selected?

- Republic Day celebrates India's adoption of the Constitution and transition to a democratic republic.
- The parade, led by the President in New Delhi, showcases military strength and cultural heritage, featuring tableaux from States, Union Territories, Ministries, and departments.
- The Ministry of Defence oversees parade coordination and preparations.
- This process includes the selection and shortlisting of tableaux.

Who makes the selection?

- The Ministry follows a standardized procedure for Republic Day parade tableau selection, inviting submissions months in advance based on a specified theme.
- Proposals undergo expert evaluation, including a basic assessment and a presentation of three dimensional models.
- Factors like visual appeal, theme alignment, and local resource use contribute to final selections.
- A State can pitch multiple proposals to the committee, but only one is chosen for the final parade.
- The Defence Ministry emphasizes time constraints for the limited number of tableaux.

Alternative route to red sea

Join Telegram Group

-
- While shippers face delays in sending cargo to Europe and vice versa due to the Red Sea crisis, Israeli logistics startup Trucknet has a solution move cargo by road between Dubai and the Adanirun Haifa port in Israel.
- Cargo will move through Saudi Arabia and Jordan to reach Haifa port and proceed to Europe by sea.
- Though the startup cannot match the high volume that is moved by sea, it has a solution to move emergency goods such as medicines. This means cargo from Mumbai or Mundra can be sent to Jebel Ali, from where it could be sent by road to Haifa, and then via ships to reach ports in Europe or the U.S.

Revised rules under Schedule M

- The Ministry of Health and Family Welfare late last week notified revised rules under Schedule M of the Drugs and Cosmetics Rules, 1945.
- The revision aims to ensure that the pharma sector recommits to the manufacture of safe, effective, and high-quality drugs in compliance with international quality standards, thus benefiting both patients and industry.
- This is a response to the backlash India has been receiving over reports of substandard medicine exports.
- Last year, the country felt intense global scrutiny after the World Health Organization (WHO) issued an alert about cough syrups being contaminated with diethylene glycol and ethylene glycol.

- These are considered toxic to humans and can prove fatal.
- The contamination was allegedly found in samples taken from a batch of cough syrup made by QP Pharma hem Ltd, based in Punjab. QP Pharma hem Ltd's manufacturing licence was suspended after cough syrup, linked to child deaths in Gambia and Uzbekistan, were found to be contaminated.
- Other cases of alleged contamination have also been reported from cough syrups made in India.
- The latest revision includes five new categories of drugs pharmaceutical products containing hazardous substances such as sex hormones, steroids (anabolic and androgenic), cytotoxic substances, biological products, and radiopharmaceuticals.
- It also has additional sections including the introduction of a pharmaceutical quality system (PQS), quality risk management (QRM), product quality review (PQR), qualification and validation of equipment, and a computerised storage system for all drug products.
- According to the notification, the manufacturer must assume responsibility for quality of pharmaceutical products to ensure that they are fit for use, comply with

requirements of the licence, and do not place patients at risk due to inadequate safety, quality or efficacy.

- Additionally, companies must market a finished product only after getting “satisfactory results” from tests of the ingredients and retain enough of the samples of intermediate and final products to allow repeated testing or verification of a batch.
- The linkage between manufacturing and product quality and the interdependence has been established.
- Also, observations from ongoing risk based inspections further emphasise the need for a relook at current Good Manufacturing Practices (GMP) regulations and quality management systems being followed by pharmaceutical manufacturers.”
- Based on the above factors and to keep pace with fast changing manufacturing and quality domain, there was a need to revisit and revise the principles and concept of GMP mentioned in current Schedule M.
